

SNAB INNOVATIONS PROPOSAL

INTELLIGENT HIRING ENGINE

"Hire Skills, Not Just Resumes."

PREPARED BY

Team SNAB Innovations

Confidential Document

PROVEN EXPERTISE & VALIDATED METRICS

InterviewXpert isn't an experimental prototype. It is a tested, highly refined intelligence asset built upon rigorous multi-year market validation cycles.

YI Competition Winner

Awarded top honors at the prestigious Young Innovators (YI) Competition for exceptional architectural breakthrough and scalable engineering design.

50+ Projects Shipped

Successfully delivered over 50 enterprise-grade technology modules, ensuring consistent infrastructure performance and scalable digital logic.

1.5 Years Dedicated R&D

Deep research and continuous engineering development spent fine-tuning NLP parameters, predictive modeling logic, and behavioral algorithms.

Tested on 500+ Profiles

Extensively benchmarked with over 500 candidate profiles across rigorous quantitative aptitude and semantic technical interview sets.

THE ECONOMIC BURDEN OF SCREENING

⚠️ Structural Overhead

Standard corporate pipelines lose hundreds of technical human hours processing unverified CV sheets and coordinating initial alignment screens manually.

↘️ The Fatigue Variable

Subjective evaluation error risks increase when recruiters face high applicant volumes, leading to irregular data metrics across hiring loops.

The Strategic Solution

By decoupling candidate evaluation from early-stage manual operational overhead, InterviewXpert builds a hyper-efficient screening mechanism focused entirely on verified capabilities.

CORE PIPELINE AND AUTOMATION FLUIDITY

Our automated system acts as a persistent layer between applicant sourcing pipelines and final hiring decision points.

1. Smart CV Parse

Semantic skill parsing reads beyond keyword matches.

2. Logic Alignment

Maps role complexities dynamically.

3. AI Interview

Conversational engine scores technical depth.

4. Integrity Guard

Monitors testing tabs for active validation.

5. Quant Analysis

Generates normalized matrix scores.

6. Clean Report

Delivers streamlined insights instantly.

OMNICHANNEL ENGAGEMENT & AGILITY FORWARD

Native WhatsApp Integration

Direct interview links, test schedules, and real-time support messaging configured straight to candidate mobile channels to dramatically boost completion metrics.

Automated Email & SMS Nudge Triggers

Intelligent drop-off management schedules contextual follow-up patterns automatically, ensuring clear communication flow without manual oversight.

On-Demand Custom Feature Pipeline

Agile architecture engineered to design and deploy custom modules, analytical configurations, and tailored evaluation schemas dynamically.

TRILINGUAL INTERVIEW ENGINE CAPABILITY

Our localization model addresses regional market variations by providing natural conversational tracking across critical linguistic parameters.

Why Localization Matters

Our trilingual pipeline accurately assesses logic accuracy and role competence separate from English vernacular skill alone. This ensures bias-free evaluation matrices across mass-market operational roles.

MARKET COST COMPARISON & ECONOMIC LEVERAGE

InterviewXpert offers a powerful cost structure that reduces entry costs down to ****20%**** of legacy market software options, while maintaining high precision metrics.

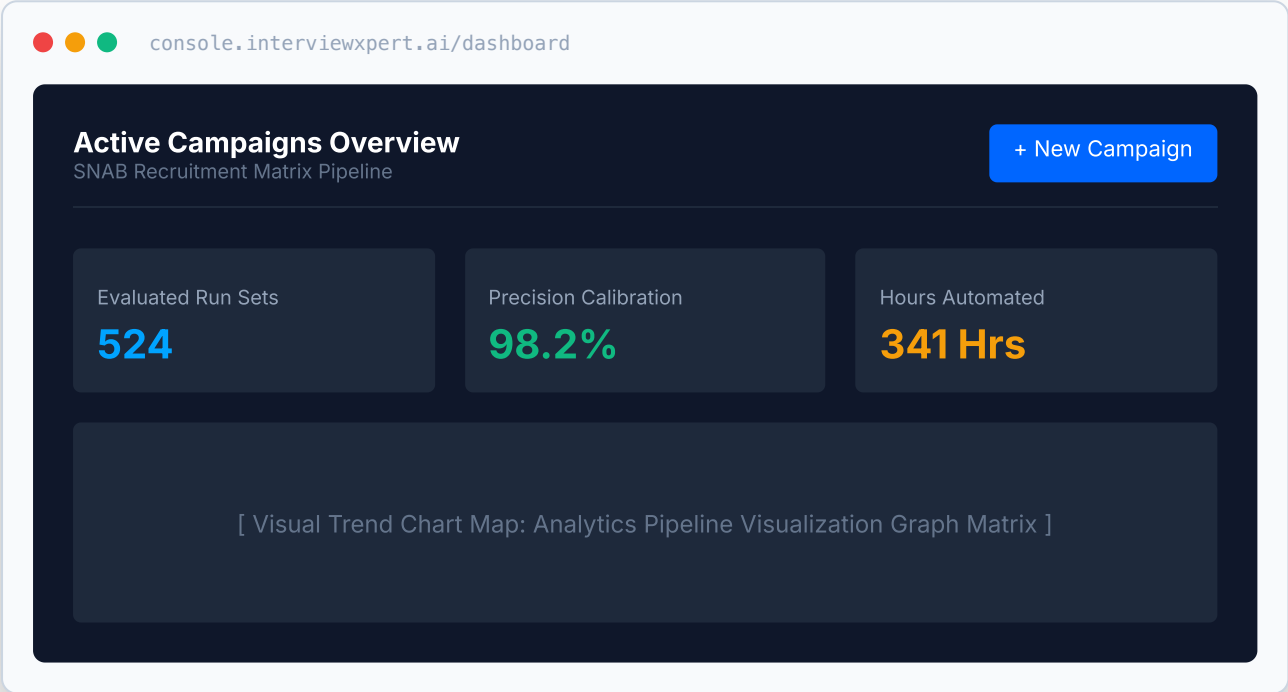

COMPARE VARIABLES	LEGACY PLATFORMS	INTERVIEWXPERT
Operational Cost Unit	100% Full Market Rate	20% Cost Framework (80% Saved)
Evaluation Precision	Keyword/Pattern Level Only	High Context Accuracy Analysis
Messaging Channels	Email Communication Only	Omnichannel Email + WhatsApp Hub
Localization Logic	Monolingual Only	Trilingual (EN / HI / MR) Engine
Feature Updates	Rigid SaaS Architecture	On-Demand Agile Adaptation

✓ Scale your hiring capability up by **5x** without increasing your baseline recruitment spend.

EXECUTIVE INTERACTION DASHBOARD PLATFORM

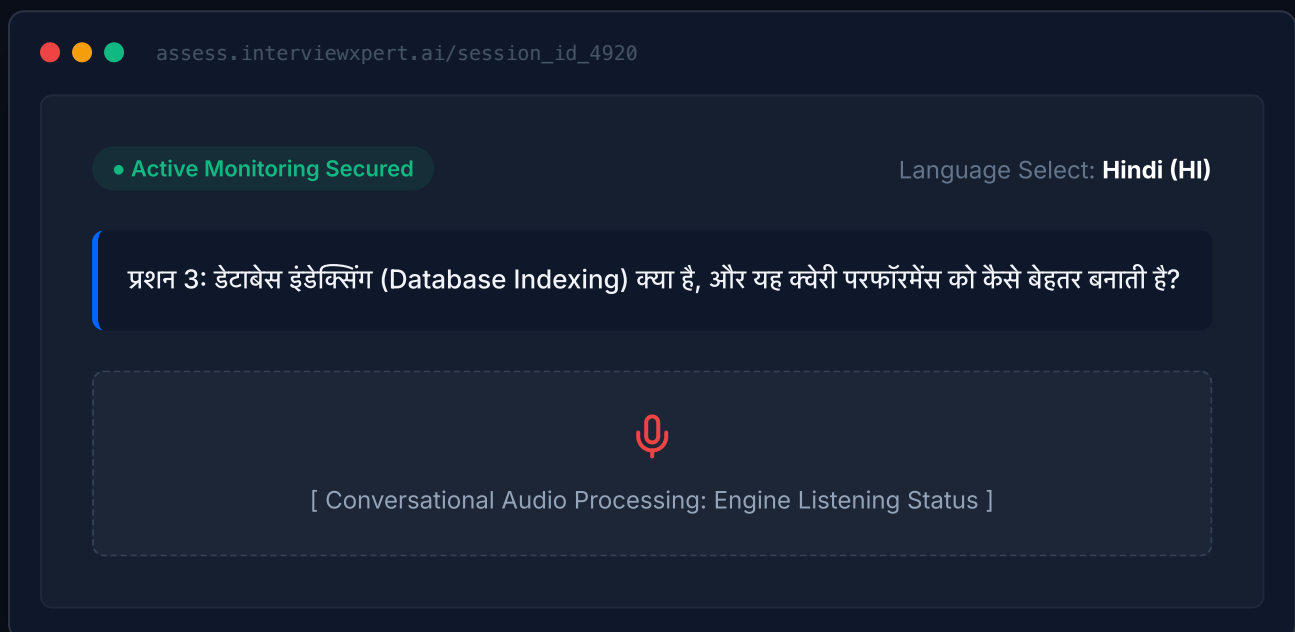

The central platform architecture organizes evaluation matrices, configuration parameters, and analytics into a clean, unified dashboard workspace.

REAL-TIME CANDIDATE ASSESSMENT MODULE

The lightweight, highly optimized mobile and desktop candidate interview panel runs smoothly even on lower-bandwidth networks.

ENTERPRISE-GRADE DATA GOVERNANCE

Data protection regulations guide every tier of the database management system and operational loop in InterviewXpert.

Encryption Protocols

Full AES-256 data protection at rest and TLS 1.3 encryption mechanisms protect candidate assessment parameters end-to-end.

PII Obfuscation Layer

Personally Identifiable Information filtering masks sensitive metrics during early assessment stages to guarantee clean, bias-free evaluations.

Cloud Infrastructure Redundancy

Built on dependable cloud clusters with geographically isolated backup processes to guarantee 99.9% platform availability.

FOUR-PHASE SYSTEM INTEGRATION LOOP

Phase 1: Workflow Discovery

We map internal grading matrices, target role criteria, and evaluation priorities.

Phase 2: Custom Optimization

Configuring customized language engines and connecting communication channels, including automated WhatsApp messaging.

Phase 3: Integration Launch

Opening access ports for live recruitment campaigns and candidate workflows.

Phase 4: Metrics Optimization

Analyzing candidate scoring data to help teams make confident, data-backed hiring selections.

READY TO BUILD THE FUTURE?

Deploy disruptive automation parameters to scale
organizational capabilities efficiently.
